

U

PD Dr. Martin Wolf
Biomedical Optics Research Laboratory
Clinic of Neonatology
University Hospital Zurich

Coworkers

- Prof. Hans-Ulrich Bucher, MD
- PD Dr. Jean-Claude Fauchère, MD
- Dr. Derek Brown, Biophysicist
- Dr. Geert Morren, Biomedical Signal Analysis
- Dr. Andrea Bauschatz, MD
- Dr. Ursula Wolf, MD
- Daniel Haensse, Ph. D. Student, Electrical Engineering ETH
- Manuel Murbach, MS Student, Electrical Engineering ETH
- Marcel Meerstetter, MS Student, Electrical Engineering ETH
- Martial Jacoma, MS Student, Electrical Engineering ETH
- Robert Hunger, MS Student, Electrical Engineering ETH
- Thilo Grundmann, Computer Science Student, TU Hamburg
- Angela Chappatte, MD Student, University Zurich

Research areas

- Near-infrared spectrophotometry
 - Functional imaging of brain activity
 - Oxygenation
 - Frequency domain spectroscopy

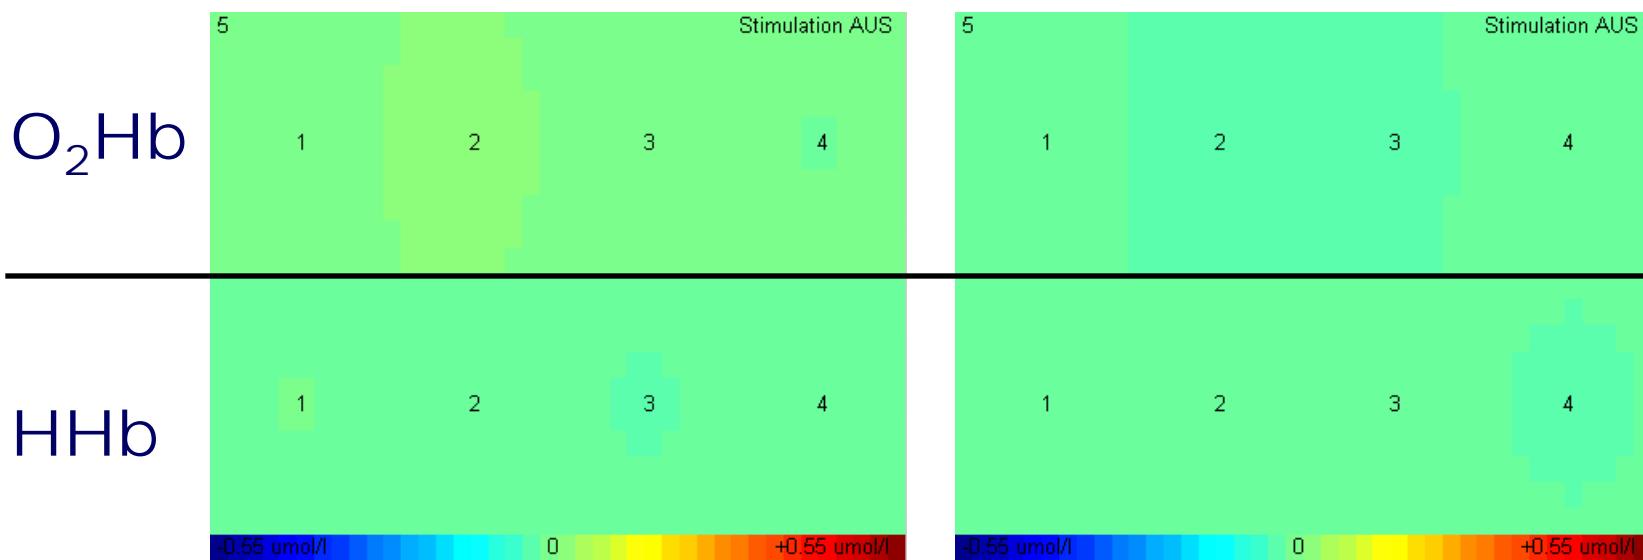

Brain activity: Two signals

- Fast neuronal signal
 - Neuron
 - Milliseconds
- Slow hemodynamic signal
 - Hemoglobin concentration
 - Change in blood flow
 - Seconds

Functional near-infrared spectrophotometry and imaging

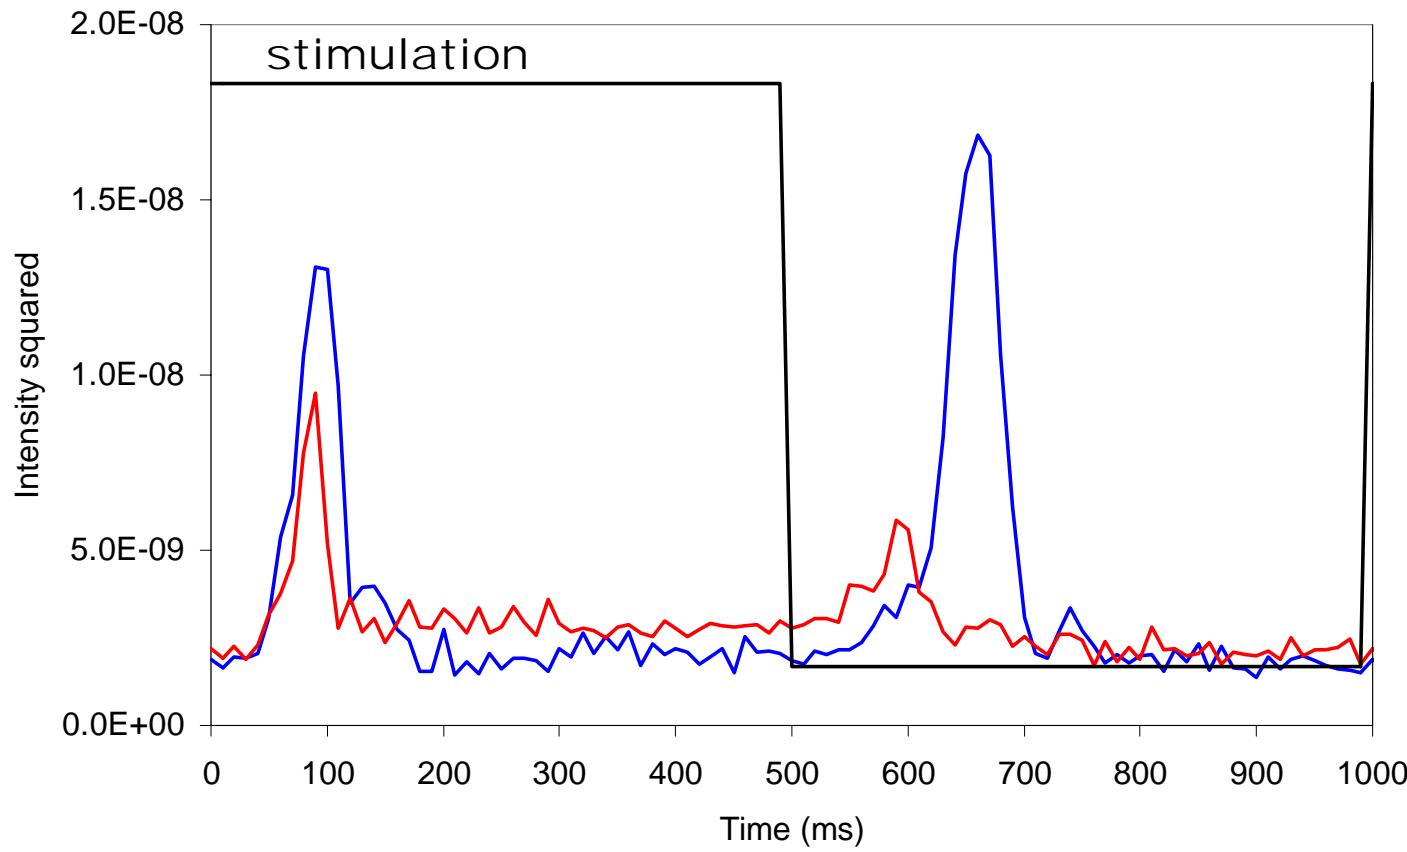

Stimulation
Ipsi-lateral

decreases ← increases

U
usz

Fast neuronal signal: Two infants

Instrumentation

Imaging Sensor

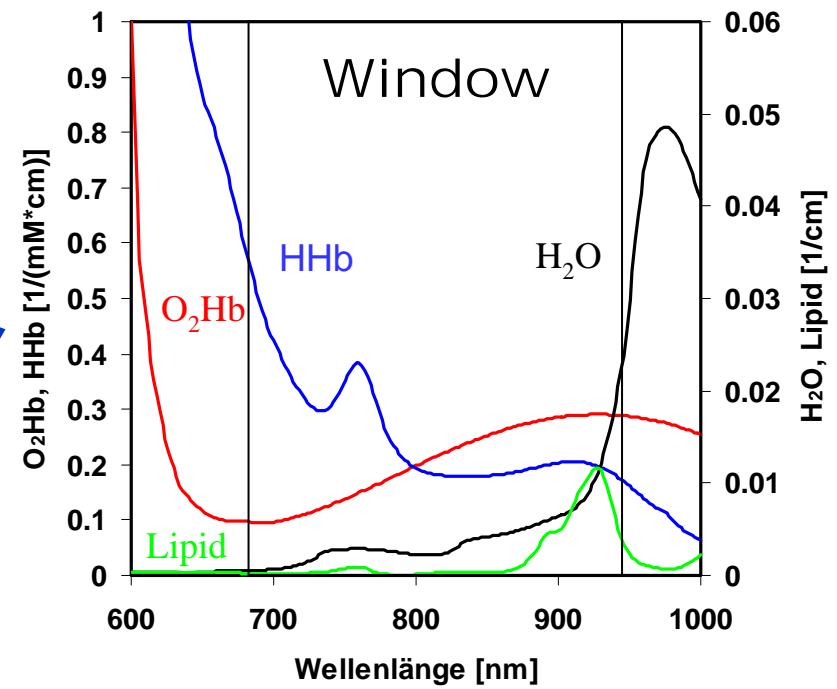

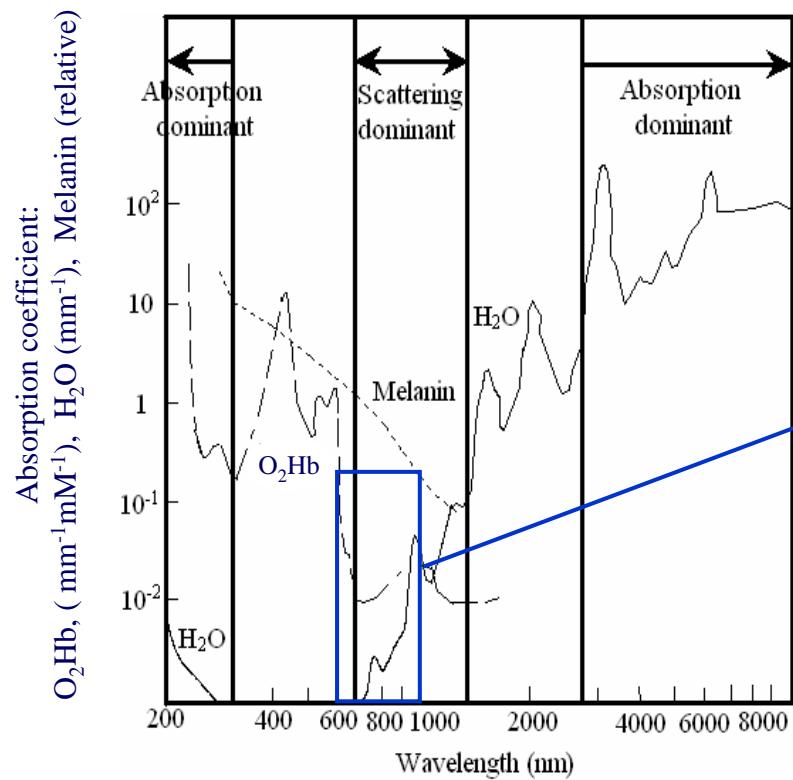

Instrument

U
usz

Oxygenation by near-infrared spectrophotometry

- Hemoglobin concentration
- Hemoglobin flow
- Arterial, tissue and venous oxygen saturation of hemoglobin

Frequency-Domain Spectroscopy

U

USZ

Instruments

- High Speed Optical Brain Imager MCP II
- ISS® Inc. Imagent
- UV-VIS Spectrometer Shimadzu® UV 1601
 - 190nm –1100nm
- Hamamatsu® NIRO 300

Collaborations

- Medicine
 - Intensive care medicine, Pediatrics, (Neuro-) Surgery, Gynecology & Obstetrics, Traumatology, Sports medicine, Anesthesiology, Psychiatry
- Toxicology
 - Radiation of mobile phones
- Neuroscience
- Industrial
 - Miromico, ISS, Schiller

Expectation of bmpn

- Enhance
 - Interdisciplinary collaboration in research
 - Industrial collaboration
 - Teaching
